DETAILED ACTION

Specification

The attempt to incorporate subject matter into this application by reference to 10/007,788 is improper. This incorporation of material would have been proper if either it had been set forth upon the filing of the present application, or if priority to the previous application 10/007,788 had been established upon the filing of the application. Applicant is advised to file a C-I-P so as to properly set forth this subject matter. Additionally, as the subject matter of 10/007,788 is essential to patentability, the subject matter needs to be positively set forth in the specification, not merely set forth through an incorporation by reference.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9 and 11-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to

Art Unit: 3728

one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The subject matter added to claims 9 and 23, although sufficient to define over the prior art of record, is considered new matter.

The Applicant is not entitled to add this subject matter to the present application in the manner attempted.
